

**PROPERTY GUARDIAN**

A Green Shield Company

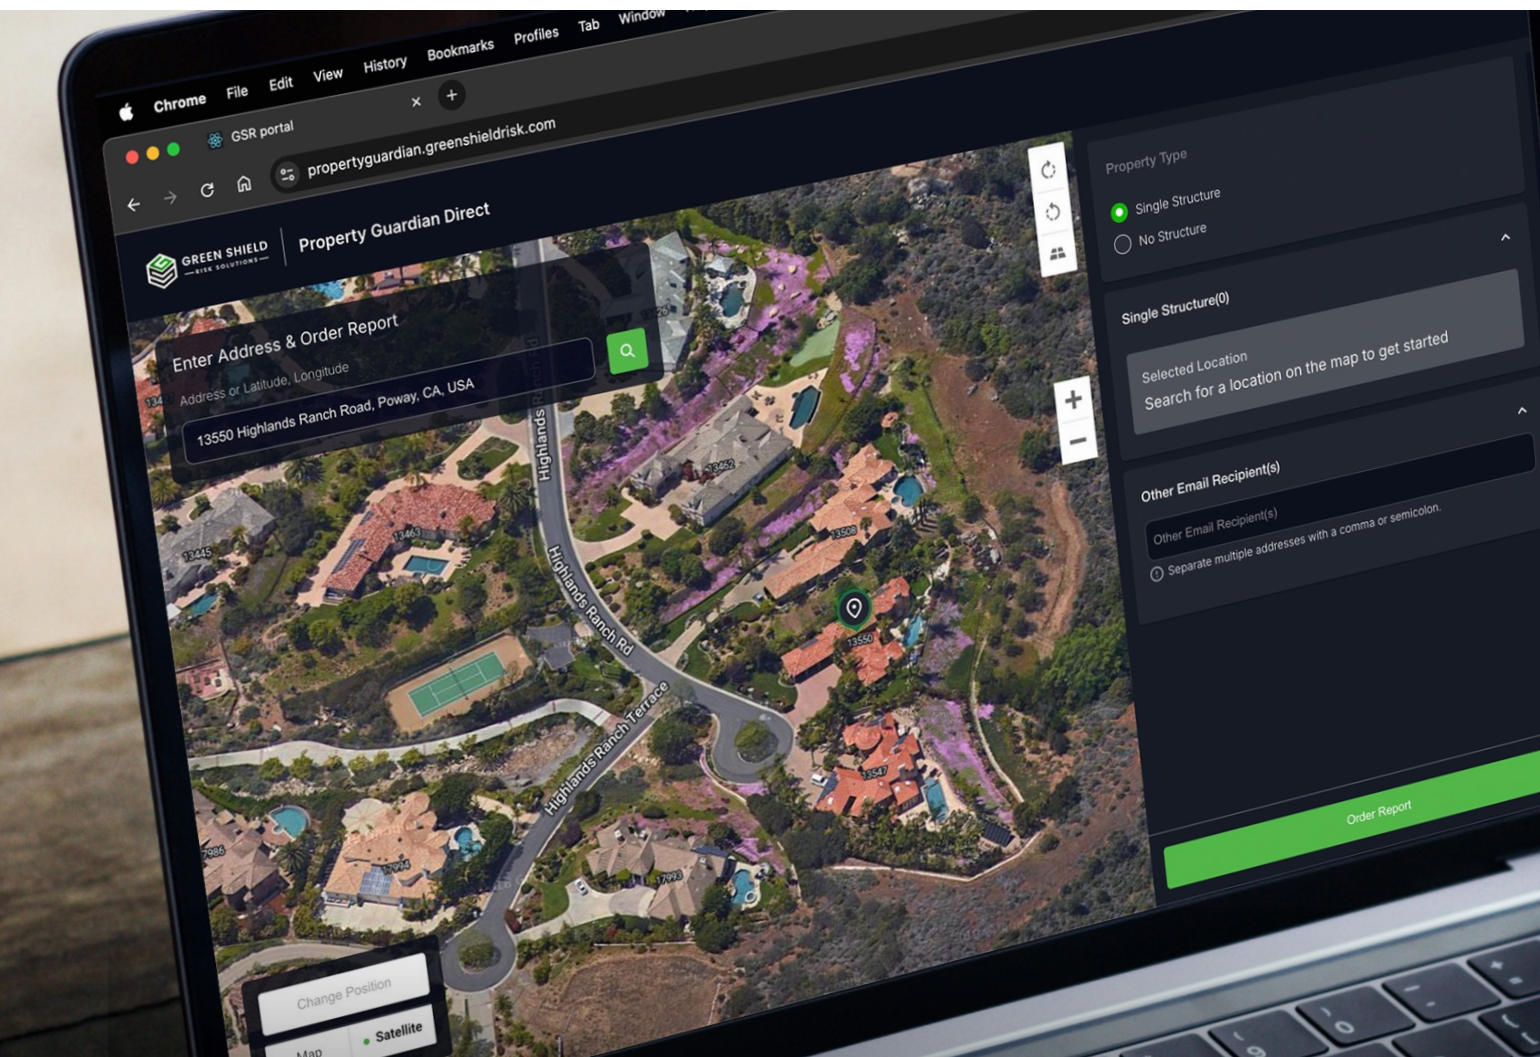

# The Property Guardian™ Advantage

As wildfires rage with increasing frequency and intensity, property owners and insurers are finding themselves in a daunting, ever-changing terrain. Enter Property Guardian™ — your partner in navigating this fiery landscape. Our suite of solutions, powered by the most advanced wildfire analytics available, deliver unparalleled property-level insights and bespoke mitigation strategies to improve your underwriting results and drive profitable revenue growth.

**GREEN SHIELD**  
— RISK SOLUTIONS —

# Grow a Profitable Wildfire Book with Confidence

The **Property Guardian™** suite of wildfire solutions are redefining risk selection and resilience, providing you the tools you need to capture premium from locations that would have previously been declined. Our solutions can be deployed at scale to improve underwriting results, profitably grow your book of business, reduce costs and optimize your loss control efforts.

Relying on traditional risk scores and catastrophe models will tell you only part of the story. Our approach is rooted in expert-backed science, and forged in partnership with leading data and modeling providers. We deliver more than a score, offering timely insights into properties at the structure, parcel, community and regional levels – all in a single, actionable report.

## Powerful Risk Insights Delivered in Minutes

Our Property Guardian™ Direct platform simplifies report ordering and delivery, with easy bill pay, invoicing and on-demand support when you need it. Enter any US address in our modern web application, order a Core report, and have it delivered in your inbox in minutes. Enhance your risk selection by gaining accurate structural and parcel insights into a property, enabling you to confidently and profitably expand your portfolio.

## Tailored, Actionable Mitigation Recommendations

Looking for deeper risk mitigation recommendations? With our Executive Reports, delivered via our robust, end-to-end Risk Mitigation Platform, turn risk assessment into actionable resilience with an expert review and opinion of risk from our team, along with custom engineering and mitigation guidance for the property. Eliminate costly in-person assessments so that you can improve productivity and focus your loss control efforts on the areas that matter most.

## Science Powered by Leading Data & Modeling Partnerships

We've partnered with the industry's best data and modeling providers to leverage more than 200 advanced wildfire data points to enable more informed underwriting decisions, improved loss prevention and stronger regulatory compliance. Our relationships with Technosylva, Spatial Informatics Group, Precisely, Guidewire, Vexcel and others set Property Guardian™ apart from the competition.

## Exceptional Risk Mitigation & Underwriting Expertise

With Property Guardian™, you get access to a top team of experienced underwriting, risk mitigation and meteorology professionals, including a former "hotshot" who has spent thousands of hours fighting active wildfires on the frontlines.

## Portfolio Audit & On-Site Field Insight Capabilities

Through our Portfolio Audit offering, we can summarize wildfire risk mitigation opportunities within your book of business or investment portfolio, and pinpoint risks to focus reunderwriting and mitigation efforts. Where on-site inspections are necessary, we have you covered. These are by-request and carefully performed by our expert team and delivered in our Risk Mitigation Platform for recommendation follow up and audit purposes.

# More Solutions from Property Guardian™

We're excited to introduce our growing suite of products that include new solutions and optimized offerings to even better meet your unique and complex needs:

## Quickly Identify Moratoriums for Active Wildfires

Receive a free daily report that uses propagation models to identify at-risk zip codes that are within conservative distance of any active wildfire.

## Embed Into Your Underwriting Guidelines

We've introduced a new Snapshot Report tailored for underwriters that includes a proprietary Wildfire Resiliency Score to simplify the overall assessment of the property's wildfire risk and resiliency. Improve risk selection and speed underwriting decision-making with a streamlined view of a property's structure, parcel, community and regional risks.

## Access Best-In-Class Wildfire Mitigation Guidance

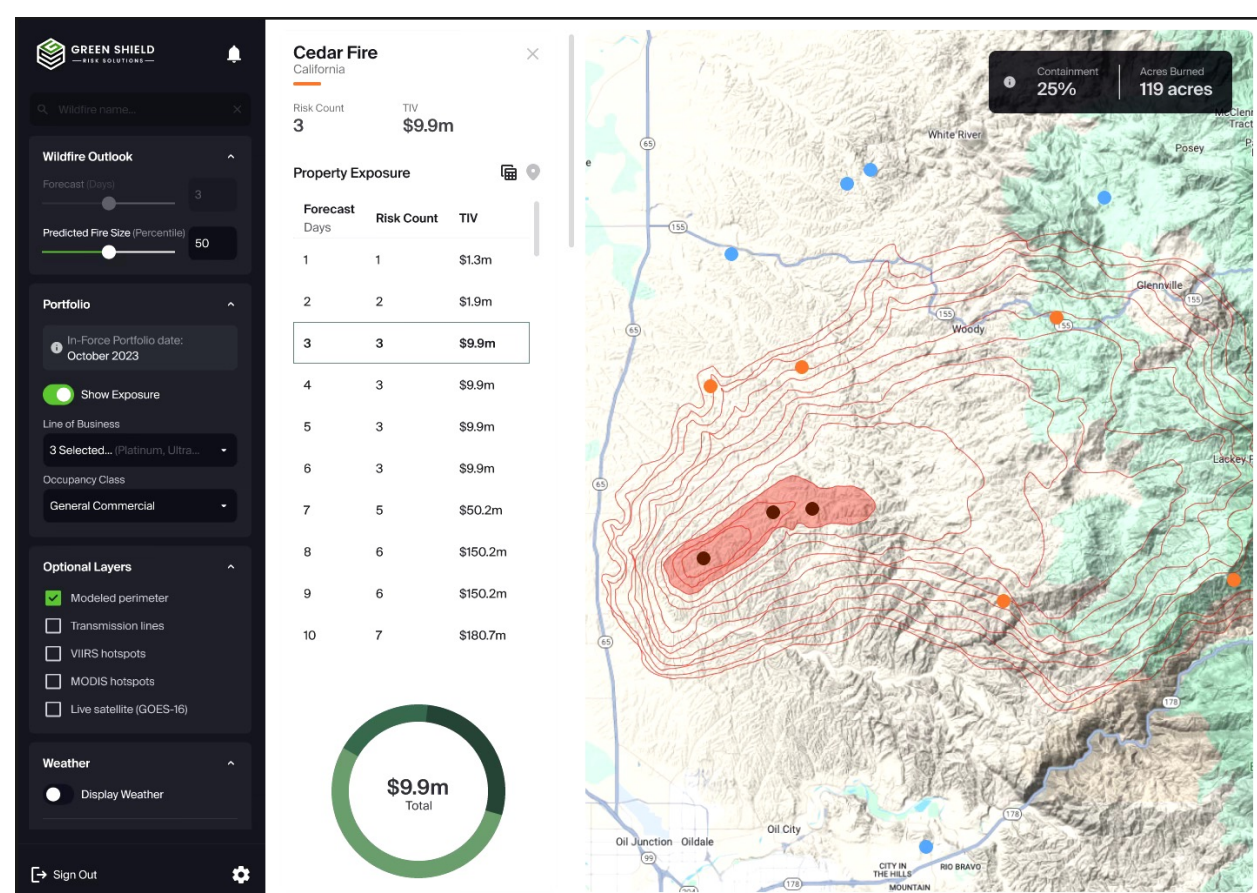

Powered by our partnership with Technosylva, a pioneer in wildfire risk analysis for utility companies and fire agencies across the globe, our Wildfire Propagation Modeling evaluates wildfire risk by dynamically simulating the ignition of 100 wildfires within a five-mile radius of the property and modeling the spread under historic environmental and weather conditions.

## Improve Modeled Losses for Reduced Reinsurance Costs

Our reports will include enhanced Wildfire Mitigation Modifiers for catastrophe modeling, capturing the granular data you need to realize reinsurance cost savings.

## Optimize Response to Active Wildfires

Through our partnerships with Spatial Informatics Group, Property Guardian™ Overwatch will leverage real-time wildfire forecast models to pinpoint potential impacted in-force risks and provide surgical guidance to focus mitigation efforts. Our tool will allow you to quickly generate reports and communicate with shareholders.
